Abstract -Student feedback analysis system is the web based feedback collection system from the students and provides the automatic generation of a feedback which is given by students for their faculty. This work was aimed to develop student level and their opinion to provide feedback in a quick and easy manner. The college and department can effectively use the online student feedback system. By using this technology we can give feedback in online system as fast as compare to the existing feedback systems. Analytical reports in an easily understandable format subject-wise along with all the parameters given. It also shows the additional comments given by students for that particular theory or laboratory. The work includes the feedback form for facilities provided by the college.

Keywords:Feedback, online System, students, Analytics, college

I. INTRODUCTION

Analysis on the student Feedback system is used to get the feedback from the students. It generates the reports for the faculty on the basis of given feedback by the students. The staff will be provided with separate usernames and password in order to check the results. capabilities for selecting particular subject for feedback and generate the report automatically, build student details, student-related data needs in a college. Using the latest Microsoft technology, the .Net framework and ASP.Net, our system is a complete feedback management and staff interaction system with built-in features proofing that easily supports Integration with the latest student staff feedback system providers. A Online Student Feedback System is an automatic feedback generation system that provides the proper

feedback to the teachers as per the categories like always, poor, usually, very often, sometimes. Download Student Staff Feedback System Project faculty to the class.

1.1 Online based Feedback(Times New Roman, Font Size 10)

The secured and analysis student Feedback System is a management information system for education establishments to manage student data. Student Feedback Systems provide capabilities for selecting particular subject for feedback and generate the report automatically, build student details, student-related data needs in a college. Using the latest Microsoft technology, the .Net framework and ASP.Net, our system is a complete feedback management and staff interaction system with built-in features proofing that easily supports Integration with the latest student staff feedback system providers. A Online Student Feedback System is an automatic feedback generation system that provides the proper feedback to the teachers as per the categories like always, poor, usually, very often, sometimes. Download Student Staff Feedback System Project Report.

1.2 Remote accessible Feedback

The provision may as well have a database of survey which can be given to the understudies following a secured. In the existing system students can give feedback about the lecturers by doing manually. By this process student can give fter that those all grade report is viewed by the HOD which is given by the faculty. It is provided as an Application Service Provision thus offering low setup costs.student staff feedback system.doc

(Size: 2.3 MB / Downloads: 858). Hence estimating the performance of lecturers and giving feedback to college staff. So, the existing system carries more time to do a piece of work for this reason the online system feedback is implemented. After that those all grade report is viewed by the HOD which is given by the faculty. It is provided as an Application Service Provision thus offering low setup costs.student staff feedback system.doc (Size: 2.3 MB / Downloads: 858). Hence estimating the performance of lecturers and giving feedback to college staff. So, the existing system carries more time to do a piece of work for this reason the online system feedback is implemented.

II. METHOD OF FEEDBACK PROCESSING MODULE

The Student Feedback System is a management information system for education establishments to manage student data. Student Feedback Systems provide capabilities for selecting particular subject for feedback and generate the report automatically, build student details, student-related data needs in a college. An Student Feedback System is an automatic feedback generation system that provides the proper feedback to the teachers as per the categories like always, poor, usually, very often, sometimes

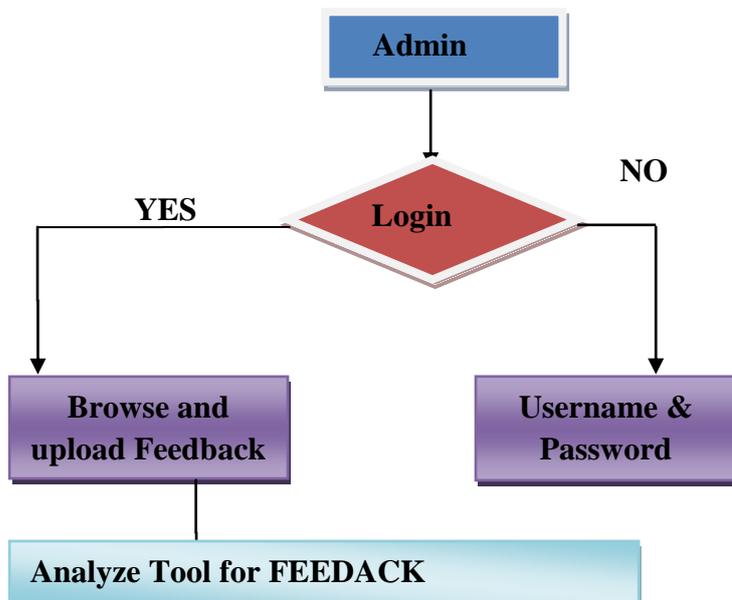

Figure 1: STUDENT FEEDBACK ANALYSIS SYSTEM

2.1 StudentAcademic feedback

- Student can give the feedback about the lecturers on the scale of five. Students can give feedback about the lecturer based on
- 1) Decision making power is provided by this system.
 - 2) Accurate result can be obtained.
 - 3) This system makes Selection process more effective
 - 4) To increase efficiency proposed system is depend on classification method.
 - 5) Proposed system is used to reduce confusion at the time of processing feedback average.

2.2 Feedback view on student Data

Admin is the responsible for creating a class and assigning the corresponding faculty to the class. Within short time we can get the performance of the faculty from the student point of view. There are 15 questions to evaluate the status of faculty and each question contains 5 options like Excellent, very good, good, Average and Poor.

2.3 HEAD OF DEPARTMENTS VIEWS

These feedback reports were checked by the Hod's. He can view overall grades and view the grades obtained to the lecturers and give this report to the principal and he can give counseling to the college staff.

2.4 Maintenance on FeedbackSystem

Finally, report was referred by the principal and give suggestions to lecturers to improve their teaching. These are the four modules present in the project so we have developed these things in very easy and clearly understandable way. So, by seen above description the proposed system having many advantages as compared to the existing system.

Highlights:

- Saves your time
- Manage the entire process in easy and quick way
- Enhance the staff
- Improve the issuing standards

III. RESULTS AND DISCUSSIONS

In order to maintain a good recognition at college, the management does every possible aspect in maintaining the qualities of the lecturer's. As this is the online-era, where everything is online we need to develop a system in online which is very useful to maintain feedback reports by the administrator. Nowadays, educational Institutions are paying increasing attention to the views of Student's on the involvement in learning and teaching through reviews or feedbacks. Online Feedback System is a web application which provides base for the schools/colleges to conduct student's feedback online

Figure 3: STUDENT FEEDBACK ANALYSIS SYSTEM

IV. CONCLUSION

Online Student Feedback system is designed in order to reduce the burden of maintaining bulk of records of all the students' feedback details who study in an Educational Institution. Giving the feedback details of a student is easy when it is compared to the manual feedback and storing. Report is generated in an easily understandable format.
