Abstract - Online student feedback system is the web based feedback collection system from the students and provides the automatic generation of a feedback which is given by students for their faculty. This work was aimed to develop student feedback system to provide feedback in a quick and easy manner from college website itself. So this system is online student feedback system. By using this technology we can give feedback in online system as fast as compare to the existing feedback systems. This work generated the reports in an easily understandable format subject-wise along with all the parameters given. It also shows the additional comments given by students for that particular theory or laboratory. The work includes the feedback form for facilities provided by the college.

Keywords: Feedback, online System, students

I. INTRODUCTION

Student Feedback system is used to get the feedback from the students. It generates the reports for the faculty on the basis of given feedback by the students. The staff will be provided with separate usernames and password in order to check the results. The total report is visible to the people like chairman and principal. It contains the modules like student, faculty and admin. Admin is the responsible for creating a class and assigning the corresponding faculty to the class.

1.1 Generate Feedback (Times New Roman, Font Size 10)

The Online Student Feedback System is a management information system for education establishments to manage student data. Student Feedback Systems provide capabilities for selecting particular subject for feedback and generate the

report automatically, build student details, student-related data needs in a college. Using the latest Microsoft technology, the .Net framework and ASP.Net, our system is a complete feedback management and staff interaction system with built-in features proofing that easily supports Integration with the latest student staff feedback system providers. A Online Student Feedback System is an automatic feedback generation system that provides the proper feedback to the teachers as per the categories like always, poor, usually, very often, sometimes. Download Student Staff Feedback System Project Report.

1.2 Automated accessible Feedback

The provision may as well have a database of survey which can be given to the understudies following a secured. In the existing system students can give feedback about the lecturers by doing manually. By this process student can give feedback in online system without wasting his time in writing. This system is designed to be simple to use, simple to understand and easy to implement and configure to fit. After giving feedback by every student papers are collected by the faculty and calculated the overall grade for each subject and each lecturer.

After that those all grade report is viewed by the HOD which is given by the faculty. It is provided as an Application Service Provision thus offering low setup costs.student staff feedback system.doc (Size: 2.3 MB / Downloads: 858). Hence estimating the performance of lecturers and giving feedback to college staff. So, the existing system carries more time to do a

piece of work for this reason the online system feedback is implemented.

II. METHOD OF FEEDBACK PROCESSING MODULE

The Student Feedback System is a management information system for education establishments to manage student data. Student Feedback Systems provide capabilities for selecting particular subject for feedback and generate the report automatically, build student details, student-related data needs in a college. An Student Feedback System is an automatic feedback generation system that provides the proper feedback to the teachers as per the categories like always, poor, usually, very often, sometimes

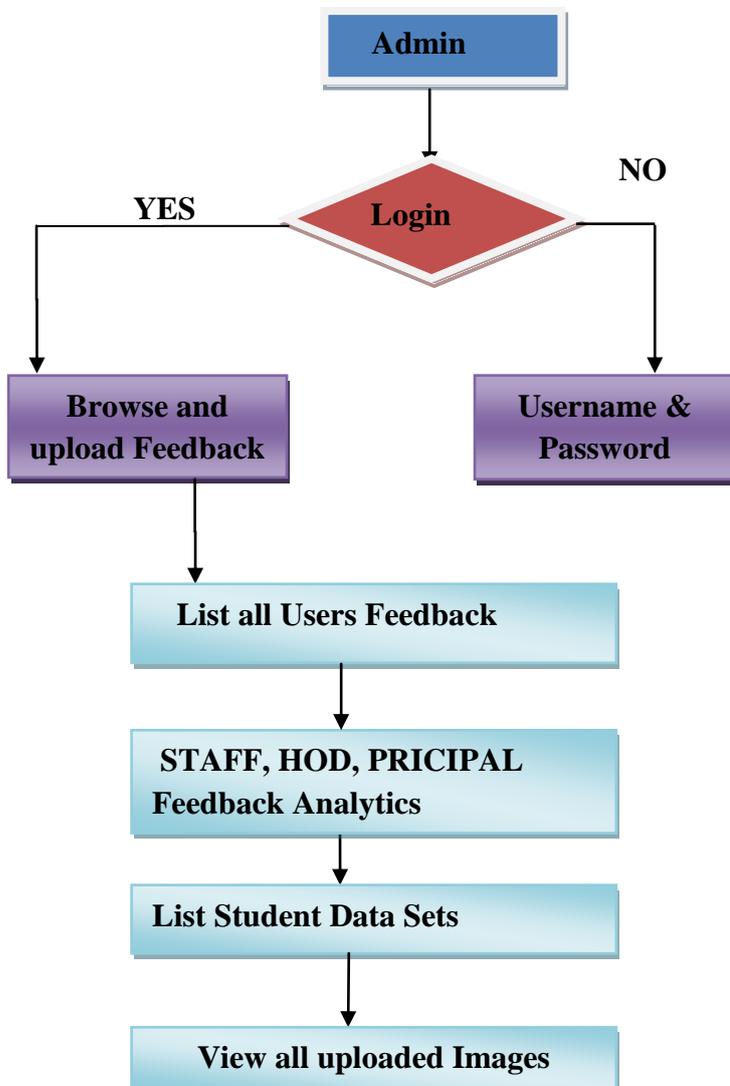

Figure 1: STUDENT FEEDBACK SYSTEM

2.1 Entry on Student Module

Student can give the feedback about the lecturers on the scale of five. Students can give feedback about the lecturer based on interaction of lecturer in the class room with students. Here we shared complete list of student projects that we shared in this page. Screenshot of Employee and Payroll System; Project SRS. IEEE Standard SRS. According to that, students can give feedback as per the given grades.

The student will have the authorities on this as following:

- 1) View questions
- 2) Giving feedback about the lecturers

View questions:

In this module students can view all questions in the database to give feedback about the lecturers

Giving feedback about the lecturers:

In this student can give feedback about the lecturer according to questions given in the database

2.2 Staff views on Feedback

The feedback given by the students can be viewed by the staff and improve their performance in teaching and other aspects

The staff will have the authorities on this as following:

- 1) Add questions
- 2) Update questions
- 3) View questions
- 4) View report

Add questions:

In this module the staff or Hod's can add questions if he is interested to add another question to database to rate the lecturers.

Update questions:

In this module the staff or Hod's can update questions.

View questions:

In this module students can view all questions in the database to give feedback about the lecturers

View report:

After giving feedback by the lecturers, Hod's, principal can view report.

2.3 Head Of Departments views on Feedback :

These feedback reports were checked by the Hod’s. He can view overall grades and view the grades obtained to the lecturers and give this report to the principal and he can give counseling to the college staff.

2.4 Principal views on Feedback

Finally, report was referred by the principal and give suggestions to lecturers to improve their teaching. These are the four modules present in the project so we have developed these things in very easy and clearly understandable way. So, by seen above description the proposed system having many advantages as compared to the existing system.

Highlights:

- Saves your time
- Manage the entire process in easy and quick way
- Enhance the staff
- Improve the issuing standards

III. RESULTS AND DISCUSSIONS

In order to maintain a good recognition at college, the management does every possible aspect in maintaining the qualities of the lecturer’s. As this is the online-era, where everything is online we need to develop a system in online which is very useful to maintain feedback reports by the administrator. Nowadays, educational Institutions are paying increasing attention to the views of Student’s on the involvement in learning and teaching through reviews or feedbacks. Online Feedback System is a web application which provides base for the schools/colleges to conduct student’s feedback online

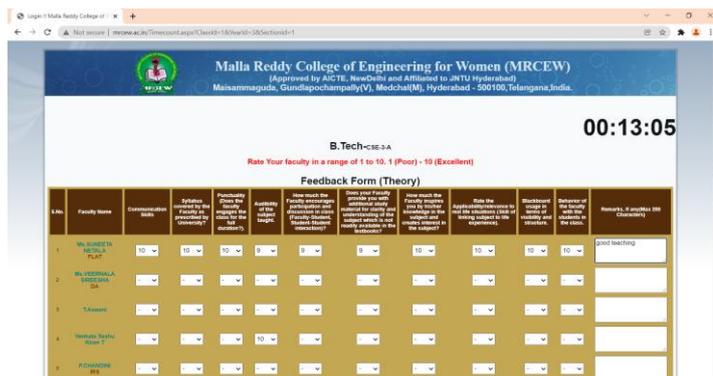

Figure 2: STUDENT FEEDBACK SYSTEM

Figure 3: STUDENT FEEDBACK SYSTEM

IV. CONCLUSION

Online Student Feedback system is designed in order to reduce the burden of maintaining bulk of records of all the students’ feedback details who study in an Educational Institution. Giving the feedback details of a student is easy when it is compared to the manual feedback and storing. Report is generated in an easily understandable format.
